In Re Application of : Ronnie G. Gipson

U.S. Serial No. : 10/045,223

Filed On : November 9, 2001

For : ARTICULATED WINDOW PANEL WITH HIDDEN
HINGE FOR VEHICLES

Examiner : C. Mah

Art Unit : 3676

Attorney Docket No. : 01-26

RECEIVED

FEB 24 2004

OFFICE OF PETITIONS

RENEWED PETITION UNDER 37 CFR 1.181

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

Applicant requests reconsideration of the decision mailed on January 15, 2004 dismissing Applicant's request to reinstate the above-identified application.

Applicant requests reinstatement under CFR 1.8(b) and encloses a verified statement by Jennifer Sinkovich, the person who executed the certificate of transmission included with the previously transmitted correspondence on U.S. Serial No. 10/045,223. This statement attests that these papers were in fact transmitted to the U.S. Patent and Trademark Office facsimile number (703) 305-7687 at approximately 2:45 p.m. on April 4, 2003.

The deficiencies noted in the Certificate of Transmission are hopefully overcome by additional evidence submitted herewith. Specifically, enclosed is an excerpt from Dura Automotive's telephone charge records, showing that on April 4, 2003 at 2:43 p.m., a long distance call was made to (703) 305-7682 of 2.8 minutes duration.

RECEIVED

MAR - 2 2004

GROUP 3600

This is consistent with the information set out on the Facsimile Cover Sheet previously submitted, i.e., that the Response to the Office Action was transmitted on April 4, 2003 at 2:45 p.m. and thus this corroborates the statements contained in the enclosed Verified Statement of Jennifer Sinkovich.

The length of time of the call indicates a successful transmission of these documents was accomplished at that time.

No other correspondence was sent to that number on that date.

It is thus respectfully urged that there is no question or doubt that the Certificate of Transmission was referring to the Response to the Office Action in U.S. Serial No. 10/045,223, transmitted at the same time.

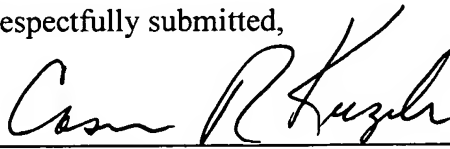

Applicant was unable to recover the report of the transmission generated by the facsimile machine itself due to the length of time since the date of the transmission in question.

Favorable reconsideration of the Petition is respectfully requested.

Respectfully submitted,

Date: February 18, 2004

Inventor: Ronnie Gipson

Dear Sir:

In response to the Office Action mailed to Dura on February 14, 2003 the following documents are to follow for submission into the USPTO:

- 1.] Transmittal Cover Letter (1 page),
- 2.] Response to Office Action mailed 02 / 14 / 2003 (7 pages),
- 3.] Certificate of Transmission under 37 CFR 1.8 (1 page), and
- 4.] Authorization to charge any fee that may be the result of this communication.

Sincerely,

Jennifer Sinkovich

**RESPONSE TO OFFICE ACTION
MAILED 02 / 14 / 2003**

Honorable Commissioner of
Patents and Trademarks
Washington, D.C. 20231

Dear Sir:

The following documents you are receiving are as follows:

- 1.] Response to Office Action mailed 02 / 14 / 2003 (7 pages),
- 2.] Certificate of Transmission 37 DFR 1.8 (1 page), and
- 3.] Transmittal Letter (1 page).

Any charges that may occur from the result of this communication, should be taken from Account number 500865, registered to Dura Automotive Systems, Inc.

Also, we ask that you please acknowledge receipt of this communication. A USPTO stamp of receipt upon this sheet, returned to the fax number of 248-299-2820, would be appreciated.

Sincerely,

Jennifer Sinkovich

Title: Articulated Window Panel With Hidden Hinge For Vehicles
Attorney Docket: 01-26

Hon. Commissioner of Patents and Trademarks
Washington, D.C. 20231

AMENDMENT

Sir:

In response to the Office Action mailed February 14, 2003, please amend the application in accordance with Amendments in a Revised Format as follows and consider the remarks set forth below.

Claims 1 and 17 have been amended.

Amendments to the Claims

1. (currently amended) An articulating window assembly adapted for use with a support structure, the assembly comprising, in combination:

a windowpane having an inner surface;

an attachment member ~~adjacent~~ adjacent the inner surface, the attachment member including:

a first member; and

a second member adjacent the first member, the second member having a pivot axis, the first member and second member forming a hinged joint; and

a polymeric member surrounding a portion of the hinged joint and ~~adjacent~~ attached to the windowpane, the windowpane adapted to rotate about the pivot axis from a first position to a second position.

2. (original) The articulating window assembly of claim 1 wherein the polymer member having a portion forming a cavity around a portion of the attachment member.

3. (original) The articulating window assembly of claim 1 wherein the polymeric material is one of an elastomer, a thermoplastic, a thermoset plastic and a polyurethane.

4. (original) The articulating window assembly of claim 1 wherein the attachment member having a cylindrical rod portion, and wherein the first member having an arcuate support portion to cradle the rod therein to permit the articulation of the hinged joint.

5. (original) The articulating window assembly of claim 4, wherein the first member is a plate.

6. (original) The articulating window assembly of claim 1 wherein the first member having one of a planar portion and an arcuate surface to engage the second member.

7. (original) The articulating window of claim 1, wherein the attachment member is threadably attached to the support structure.

8. (original) The articulating window of claim 1, wherein the polymeric member is bonded to the inner surface.

9. (original) An articulating window assembly adapted to for use with a support structure, the assembly comprising, in combination:

a windowpane having an inner surface;

a hinge member adjacent to the inner surface, the hinge having a cylindrical member having a pivot axis, and a stud member attached to the cylindrical member; and

a polymeric member surrounding at least a portion of the hinge member so as to

permit the hinge member to articulate about the pivot axis.

10. (original) The articulating window assembly of claim 9, wherein the cylindrical member having a longitudinal portion articulating about the pivot axis.

11. (original) The articulating window assembly of claim 9, wherein the stud member having a longitudinal axis being offset from the pivot axis.

12. (original) The articulating window assembly of claim 9, wherein the stud member being connected to the support structure.

13. (original) The articulating window assembly of claim 9, wherein the cylindrical member having a portion forming an axle about which the cylindrical member pivots.

14. (original) The articulating window assembly of claim 9, wherein said hinge member including:

a reinforcement plate adjacent to the hinge member.

15. (original) The articulating window assembly of claim 14, wherein the reinforcement plate having at least one arcuate portion to support the cylindrical member and adapted to cradle the cylindrical member, therein.

16. (original) The articulating window assembly of claim 14, further including a sleeve interposed the reinforcement plate and the axle.

17. (currently amended) An articulating window assembly adapted for use with a support structure, the assembly comprising in combination:

a windowpane having an inner surface;

a hinge adjacent to the windowpane and having a pivot axis; and

a polymeric member encapsulating a portion of the hinge and attached to the inner surface so as to permit the windowpane to pivot about the pivot axis from a closed position to an open position.

18. (original) The articulating window assembly of claim 17, wherein the hinge member having a base member, a cylindrical member and a stud extending from the cylindrical member.

19. (original) The articulating window assembly of claim 15, wherein the hinge further having a sleeve on the cylindrical member and wherein the polymeric member having a portion forming a cavity adjacent to the stud.

20. (original) The articulating window assembly of claim 18, wherein the base member disposed in the polymeric member and adjacent the cylindrical member to permit articulation of the hinge about the pivot axis.

REMARKS

Claims 1 and 17 have been amended. Claims 1–20 are currently pending in the application. The basis for the above amendments may be found throughout the specification, drawings and claims as originally filed. The Examiner is respectfully requested to reconsider and withdraw the objections and rejection(s) in view of the amendments and remarks contained herein.

I. Allowed Claims

The Examiner indicated allowed Claims 9-16 and 19 in the Office Action Summary. In the Detailed Action, the Examiner indicated the need to overcome the rejection(s) under 35 U.S.C. 112, second paragraph before Claims 9-16 and 18 would be allowable. The applicant's attorney has reviewed the claims but no basis for 35 U.S.C. 112, second paragraph rejection(s) were apparent. As a result, no amendments were made to Claims 9-16 and 19. If the applicant's attorney has misunderstood the basis of the rejection, the Examiner is respectfully requested to articulate the basis for any rejections to these claims. Absent any need to overcome any rejections to these claims, formal allowance of Claims 9-16 and 18 is requested.

II. Allowable Subject Matter

Claim 8 was indicated as allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph and to include all the limitations of the base claim. In view of the amendments to Claim 1, the applicant's attorney has not amended Claim 8

to include the limitations of the base claim and requests the Examiner abate any action on this claim until he has an opportunity to consider the remarks set forth below.

Claims 18 and 20 were objected to as being dependent upon rejected base Claim 17. The applicant's attorney has amended Claim 17 and the Examiner is requested to abate any action in on these claims until he has had an opportunity to consider the amendment and remarks related to Claim 17.

III. Claim Rejections Under 35 U.S.C. § 112

Claims 1 stands rejected under 35 U.S.C. § 112, second paragraph, because an element in the claim was misspelled. The misspelled word has been corrected. In view of this action, the Examiner is requested to withdraw this rejection to claim 1.

IV. Claim Rejections

Claims 1-7 and 17 are rejected under 35 U.S.C. § 102(b) as being anticipated by Morgan et al (U.S. Pat. No. 4,396,221). This rejection is respectfully traversed.

Morgan discloses a hinged window assembly with a rolled cylindrical hinge plate with a pivot and a polymeric member in Figure 11. Morgan does not disclose a polymeric member surrounding a portion of the hinged joint and attached to the windowpane as claimed in amended Claim 1. Morgan has sealing strips 102, 104 and 106 having free ends, which engage the inside surface for sealing purposes (Col. 7, lines 35-42). The sealing strips are not attached to the windowpane and when the windowpane is pivoted, the sealing lips, which are in sealing contact with the inner surface, can separate from the inner surface of the windowpane when the windowpane is pivoted. Thus, Morgan cannot anticipate the applicant's invention as claimed. Furthermore, Morgan does not teach or suggest the invention as claimed by the

inventor even when combined with the other references cited by the Examiner.

The Examiner also rejected claim 17 under 35 U.S.C. § 102(b) as being anticipated by King (U.S. Pat. No. 3,711,983). This rejection is respectfully traversed.

King is directed to a vent window hinge that includes a window panel hinged to the vehicle to be swingably moved between an open and closed position about a hinge axis. The hinge has a tubular portion that is encapsulated by a polymeric member. King does not have a polymeric member attached to the inner surface and encapsulating a portion of the hinge as claimed in applicant's amended claim 17. Therefore, King cannot anticipate the invention as claimed. Furthermore, King does not teach or suggest the invention as claimed by the inventor even when combined with the other references cited by the Examiner.

Therefore, Claims 1 and 17 are patentably distinguishable over the prior art cited by the Examiner. Neither Morgan nor King, singularly or in combination, infer, teach or suggest the combination as taught by the applicant's claimed invention.

In view of the above, Applicant submits that independent Claims 1 and 17 are not anticipated or made obvious by the disclosure of King or Morgan. Applicant respectfully requests the Examiner to reconsider and withdraw the 35 U.S.C. §102(b) rejection of independent Claims 1, and 17 along with Claims 2-8 which depend from Claim 1 as well as Claims 18 and 20 which depend on Claim 17.

V. Conclusion

Applicant has carefully reviewed the rejections set forth in the Office Action of February 14, 2003 and believes that this Amendment and the above remarks are fully responsive thereto. In view of the above, Applicant submits that the specification and claims are in condition for allowance and such action is respectfully requested at the

Examiner's earliest convenience. If the Examiner believes that personal communication will expedite prosecution of this application, the Examiner is invited to telephone the undersigned at (248) 299-7566.

Respectfully submitted,
